Duy Nguyen
Web3 Builders

✉ duyngph@gmail.com ☎ +84 909 312 432 🌐 www.0xdylan.com

I possess extensive expertise as a seasoned Builder, capable of seamlessly integrating my skills across multiple domains within a company. I have a strong command over diverse web frameworks and blockchain industry, empowering me to tackle complex challenges efficiently.

Proficient Frontend Developer with expertise in web3 technologies. Skilled in integrating blockchain functionalities and Solidity smart contracts into web applications. Passionate about crafting seamless user experiences and staying up-to-date with the latest advancements in web3 development

Experience

Freelance Frontend Developers   *2022 - Present*

- Developing a Hybrid Decentralized Exchange called Astify, check out my source and website for open source.
- I possess expertise in building decentralized applications (dApps) and working with web3 technologies. With a strong command over frontend development, I have successfully delivered projects that leverage blockchain and decentralized protocols. I am adept at integrating smart contracts, blockchain APIs, and other web3 components into user-friendly interfaces, ensuring seamless user experiences.

Founder - CTO of BionLabs   *2021 - present*

As the founder of BionLabs, a blockchain outsourcing company, I have spearheaded the development and execution of cutting-edge solutions for clients in the blockchain space.

One of our flagship projects, **BionSwap**, is a multichain decentralized exchange (DEX) with an autonomous launchpad integrated into its ecosystem.

With BionLabs and BionSwap, we are at the forefront of the blockchain revolution, providing state-of-the-art solutions that enable individuals and businesses to harness the potential of decentralized finance (DeFi) and blockchain technology.

In addition to its groundbreaking features, I'm proud to share that BionSwap has achieved significant traction during its alpha testing phase. Over 2000 users actively participated in the alpha test of the platform. This enthusiastic response underscores the growing demand for decentralized exchanges and validates the appeal of BionSwap's unique offerings.

Lead Frontend Developer - JadeLabs   *2019 - 2021*

Lead Frontend Developer at JadeLabs with responsibility e for developing, managing and distributing frontend work of decentralized applications related to layer 1 blockchains such as Ethereum, KardiaChain, BNB Smart Chain, Polygon, etc.

I'm proud to share that all these projects had become to a success production:

- HeroesTD: https://dapp.heroestd.io
- DotArcade: https://dapp.dotarcade.io
- Darkland Survival: https://dapp.darkland.io
- Hanagold: https://dapp.hanagold.finance
- TSS: https://tss.org.vn

Tech stack: ReactJS , Redux, Web3 JS, Uniswap SDK, Pancake SDK, Router V.2, Solidity, ...

And many more projects, check out my source on website and github for more information

Frontend Developer - FPT Software HCMC   *2019*

Start as Frontend Developer at FPT Software HCMC, Developed a Web Application called Ai Covid using ReactJs and some javascipt stack to design and develop this production during the covid pandemic used Django models for machine learning and Artificial intelligence.

Tech stack: ReactJS , Redux, MUI Library, Chakra Ui, Figma, ...

Website Developer - ThienHoangPhat Corp   *2017 - 2018*

Project Lead of ThienHoangPhat corp, my job is building and maintaining an web application called **VATA** and a manangement system for documentations

Tech stack: ReactJS , Redux, NodeJS, MUI Library, Chakra Ui, Figma, ...

Education

University of Information and Technology (VNU)   *2015 - 2020*

- Bachelor of Engineering, Computer Networks and Communication
- GPA: 7.83

High School   *2012 - 2015*

- Bui Thi Xuan high school
- GPA: 8.71

Skills

- ReactJS - React Stack
- Restful API
- Typescript
- Javascript

- HTML/CSS/ES6
- MongoDB
- Time Management
- Project Management
